BUSINESS MODEL

Annual subscription **per module**

INVESTMENT ROUNDS

TOTAL FUNDING

> €5M

Comprised of **EU Funding** and **private funding** mostly from a Norwegian family office. Cercare Medical has received several grants from EU as soft funding for the total sum of approx. €2.5M

BRIEF HISTORY

2013 – **founded** as a spinout of the Center of Functionally Integrative Neuroscience at Aarhus University Hospital, Denmark

More than **20 years of research** in **neuroimaging** and **artificial intelligence** led by Prof. Leif Østergaard and Prof. Kim Mouridsen

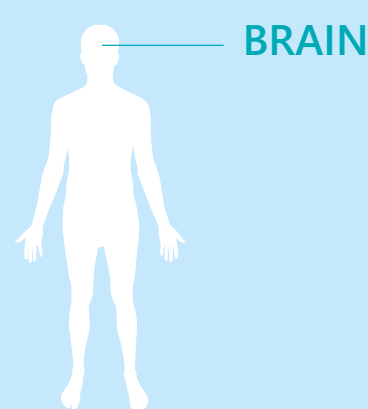

The medical software company continues to have strong connections to both the **center** and **Aarhus University Hospital**

Aarhus,
Denmark

AREA OF EXPERTISE/ CURRENT SOLUTIONS:

Cercare Medical Neurosuite is an **automated decision support solution** for **stroke** patient management and comprehensive assessment of other **neurological diseases** involving (micro)vascular pathology:

- Analysis of complex **CT and MR** data
- High-precision **oxygen extraction mapping**
- Automated **lesion detection**
- AI-driven **stroke progression** analysis

MODALITIES COVERED

CT, MRI

STEP OF THE RADIOLOGIST JOURNEY

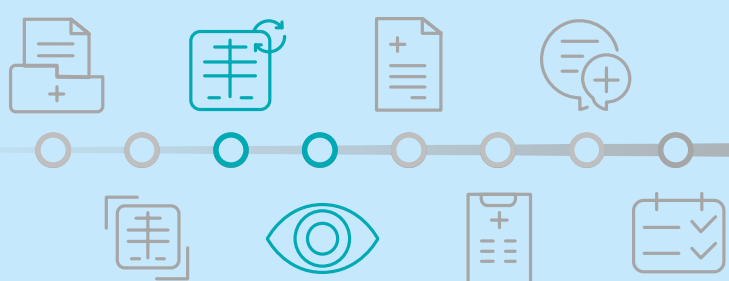

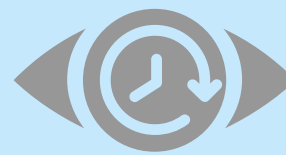

IMAGE PROCESSING, DETECTION

VISION FOR THE FUTURE

How do you see the future of the AI ecosystem?

We believe that AI has the power to increase chances for patient's **survival, recovery and even prevention** of health disorders allowing them to live a **fulfilling life**.

What is your role in it?

Our aim is to make state-of-the-art **decision support systems** available for hospitals and physicians to accelerate and **optimize clinical decision-making**.
